ABOUT US

SMG Shutterings Store is the leader in Shuttering and Scaffolding on hire and rent in India. We have more than 30 years experience in providing shuttering materials on hire basis. We have been supplying high quality shuttering and scaffolding material to various leading construction companies, builders and government agencies.

Our fully automated heavy duty plant along with state of the art work shop fitted with best in class technology makes us stand out of the competition. Our team of qualified engineers, quality control team and technical staff dovetailed with the technology at our disposal has made us the first choice for shuttering and scaffolding for construction companies and government agencies across India.

The issue of sustainability has a firm place in our business processes. Product development is already focused on the best utilization of materials and thus the most economical use. New technologies and efficient production processes ensure the best quality and long service life of our system equipment which in turn has a positive effect on the consumption of resources. Our offering is imaginative and efficient and aims to help our customers to achieve their goals. In this way, we look towards the future with enthusiasm, standing staunchly by the values and philosophy that have shaped and continue to shape our identity.

OUR SERVICE

STEEL SHUTTERING & SCAFFOLDING FOR SALES AND ALSO ACCESSORIES

We understand that the base on which a building is built is the key in construction. Our team with experienced and trained members deliver the best quality shuttering and scaffolding solutions to our clients. In the last 30 years we have served numerous clients of different stature and have exceeded their expectations everytime. Our clients are all leading construction companies in India. Our solutions are so customizable that we are even able to deliver our services to them as per their project specific needs.

We have always invested in the cutting technology to ensure that the delivery is never compromised. We have best in class technology at our fully automated plant which is the key in delivering best in class shuttering and scaffolding material to our clients.

Because the satisfaction of our customers is our priority, we strive to provide the best possible service through our support solutions or our innovations.

OUR TEAM

The team at SMG Shutterings Store is led by the visionary chairman of the company MR. SOMAY GOYAL. Mr. Goyal has vast experience in construction as well as scaffolding business and understands the pulse of the real estate and construction industry. He brings to the table his vision of providing scaffolding and shuttering services for a "Strong Foundation" to build a "Stronger Future". With this vision Mr Goyal has always invested his time and resources in setting up technologically advanced plant. Mr. Goyal is ably supported by his team constituent of civi engineers, tech wizards and people managers.

MISSION

We envisage emerging as a leading mining and infrastructure company by achieving the highest level of quality thereby playing a vital role in re-energizing the Indian mining and infrastructure industry.

Our constant endeavor is to provide the most appropriate and cost effective solution to our customers for all infrastructure and mining needs.

Overall excellence by incorporating latest technology, innovative ideas, efficient project management and above all exemplary team work.

VISION

To excel and emerge as India's leading trustworthy and innovative mining and infrastructure company by establishing a mutually beneficial long term relationships with all stakeholders.

CORE VALUES

- ENTREPRENEURSHIP
- INNOVATION
- INTEGRITY
- PASSION

INTRODUCTION TO FORMWORK

Formwork is a temporary structure, which supports fresh concrete until it becomes strong enough to sustain its own weight. After setting of concrete, the formwork is removed and a solid structure of required shape and size is produced. This is the very important element in the construction of building. Formwork system has significant role in the construction process, making the right decision by choosing the appropriate formwork system could lead to response to sustainable construction. Different systems have their own advantages but one needs to choose a formwork which best supports individual project requirement. Shortage/non availability skilled and semi-skilled workers results in problems of cost and time over-runs, inferior construction, poor finishes leakages, corrosion of structures etc. this can be avoided by adopting modern formwork systems. This also avoids repairs and rehabilitation of structures before its expected life span.

PRODUCTS FOR SALE

Adjustable Telescopic Spans

These spans provide maximum safety with minimum supervision. Fabricated out of 2 mm sheet lattices of 10 mm bar, and main bar of 16 mm & T Section of 40x5 mm. it needs no intermediate support to be provided. Its available sizes with their respective opening and load carrying capacity are as under. Available in 2 mm sheets. Lattices of 10 mm bar and main bar of 16 mm and T Section of 40x5 mm sizes.

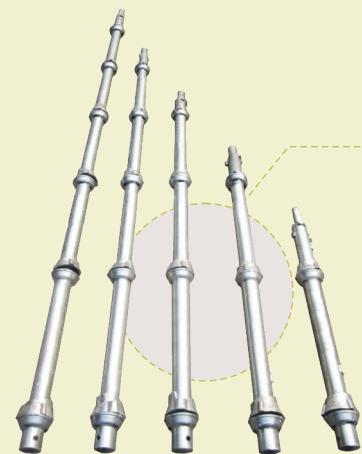

Adjustable Stirrup Head (U Jack)

The Adjustable Stirrup Head is used at the top of the standard to provide an additional maximum adjustment of 300 mm.

Available in sizes:

- U size 100x100x50 length 350 mm
